# BRINGING DIGITAL ACCURACY & SPEED TO PEN & PAPER

In most businesses today, 80% of transactions are paper-based\*.

These transactional documents require manual handling which causes delays and errors in the most crucial process of a healthy business; the order-to-cash cycle.

PlanetPress Capture accelerates the order-to-cash cycle to digital speed by capturing what is written on any transactional document instantaneously.

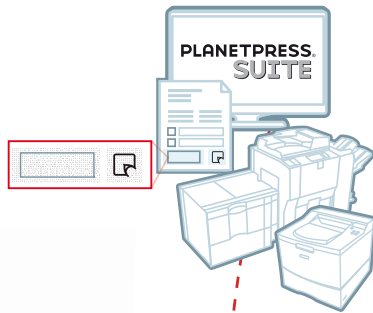

Central data systems, ERP or other, are updated with the relevant information in real-time.

Follow-up business processes, like the printing or emailing of an invoice, can be triggered instantly.

The sooner you send out an invoice, the sooner you get paid and with PlanetPress Capture, you get digital accuracy and speed without changing the way you work!

## PRINT

- Add capture zones where you need them
- New or existing document
- Print On-demand, remotely or locally

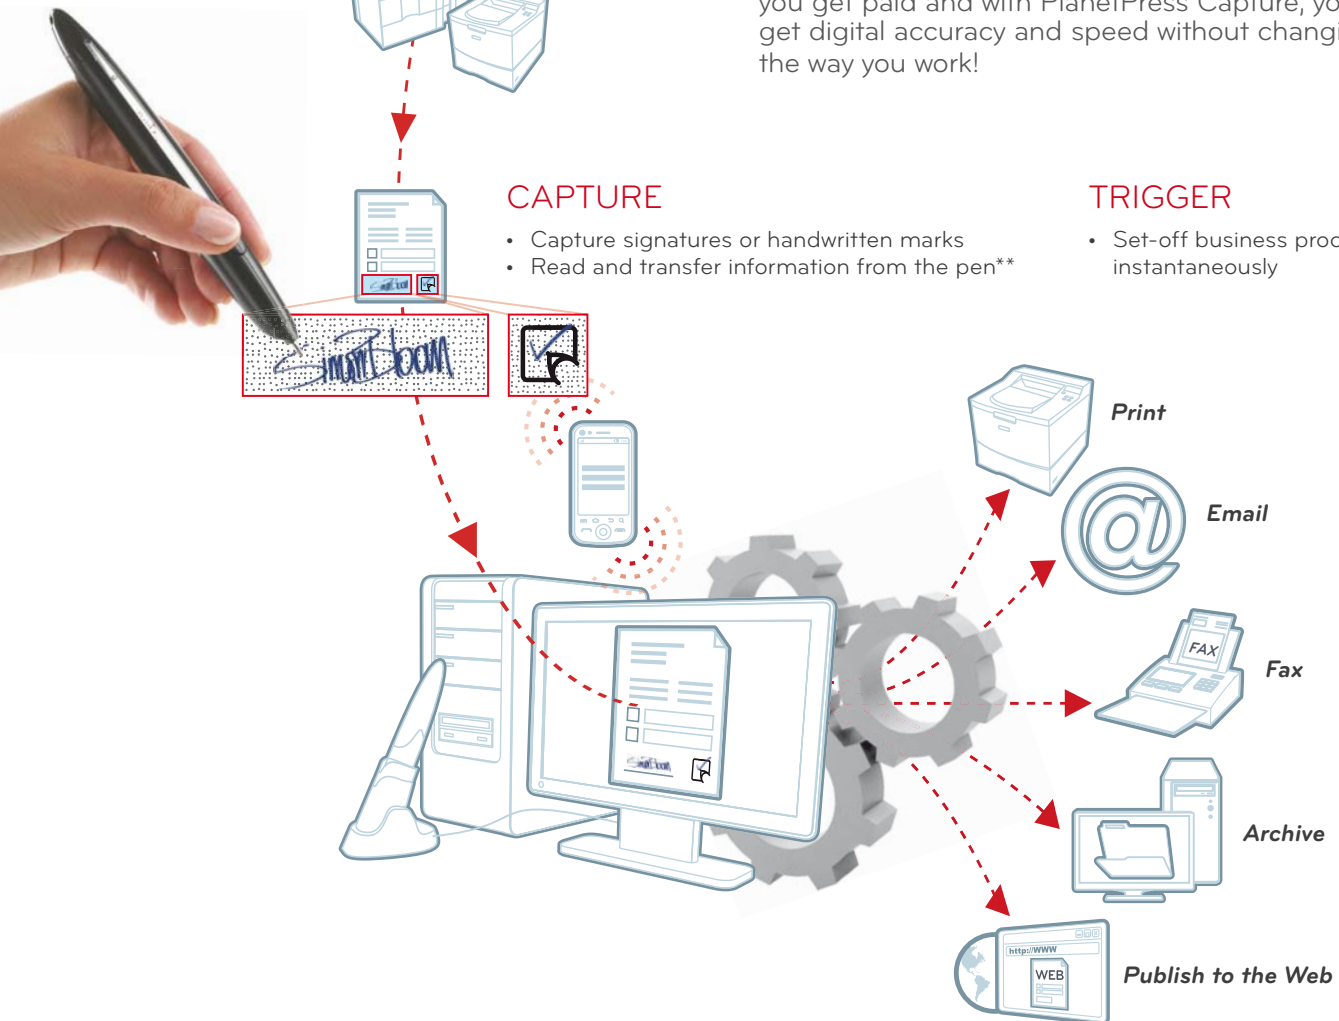

## CAPTURE

- Capture signatures or handwritten marks
- Read and transfer information from the pen\*\*

## TRIGGER

- Set-off business processes instantaneously

\* Data Capture in Transportation and Logistics, 2009, Manufacturing Insights, an IDC Company.

\*\* Bluetooth<sup>®</sup> available with version 7.4.

## TODAY

Daily transactions are printed on paper:

### Distribution

- Proof of delivery (POD)

### Manufacturing

- Bill of lading (BOL)

### Field Service

- Work orders
- Inspection forms

### Any business

- Purchase orders
- Invoices
- Contracts

## THE ISSUES

Forms must be filled-in and signed for the transaction to be recorded and payment claimed:

- Pre-printed paper forms are costly to produce and generate a lot of waste when changes occur
- Paper forms can be damaged or lost making payment recovery tedious, sometimes impossible
- Manual processing is time consuming and delays invoicing, resulting in an unstable cash flow
- Manual data-entry, scanning and filing causes errors that make documents irretrievable

## THE SOLUTIONS

Using Anoto Digital Pen and Paper and PlanetPress Suite workflow capabilities, PlanetPress Capture brings digital accuracy and speed to paper-based processes:

- Print forms on-demand locally and eliminate pre-printed stationery and shipping
- Capture what is written instantaneously and create a highly readable digital archive
- Input documents with handwriting to EDM systems automatically without manual scanning and data-entry
- Speed-up processing and cash flow by triggering any business process at point of signature
- Update central systems in real-time, ERP or otherwise, with accurate and reliable data
- Eliminate damaged, lost, irretrievable or illegible documents
- Implement a dependable and renown solution that works with your existing systems and necessitates little to no change to employee work routines
